1. Purpose

This Project Health, Safety, and Environmental (HSE) Plan outlines the procedures and requirements necessary to ensure the safe execution of all construction activities. It aims to prevent accidents, protect workers, and minimize environmental impact.

2. Scope

This plan applies to:

- All personne
- Subcontractors
- Site activities

3. HSE Policy Statement

The project is committed to:

- Providing a safe and healthy working environment
- Preventing injuries, and complying with regulations
- Preventing injuries and occupational illnesses
- Complying with all applicable safety regulations
- Continuously improving HSE performance

4. Objectives and Targets

Objective	Target
Zero fatalities	
Reduce incidents	
PPE compliance	
Training completion	

5. Roles and Responsibilities

Role	Responsibility
Project Manage	Overall HSE implementation
Safety Office	Monitor safety compliance
Site Supervisor	Ensure safe work practices
Workers	Follow safety procedures

7. Hazard Identification and Risk Assessment

All tasks must undergo:

- Hot Work
- Confined Space Entry
- Electrical Work
- Work at Height
- Excavation

8. Permit to Work System

The following activity require permits:

- Safety Helmet
- Safety Shoes
- High Visibility Vest
- Gloves
- Eye Protection

9. Personal Protective Equipment (PPE)

Minimum PPE Requirements:

- Attend site induction
- Receive task-specific training
- Be competent for assigned work

Additional PPE must be used depending on task

10. Training and Competency

All workers must:

- Risk assessment (RA)
- Job Safety Analysis (JSA)

11. Emergency Response Plan

Emergency contacts:

- Raise alarm immediately
- Stop work
- Evacuate to assembly point
- Provide first aid
- Inform management

Emergency Procedure:

- Reported immediately
- Investigated
- Recorded using Incident Report Form

12. Incident Reporting

All incidents must be:

- Waste Management
- Dust control
- Noise control
- Spill prevention

13. Environmental Management

Measures incluide:

Service	Contact
Site Emergency	
Ambulance	
Fire Department	
Hospital	

14. Safety Inspections and Audits

- Be recorded
- Assigned to responsible persons
- Completed within deadlines

15. Communication

Safety communication includes:

- This document shall be reviewed periodically
- Updates must be approved
- Latest version must be available on site

16. Corrective Actions

All identified issues must:

Name	Position	Signature	Date

17. Document Control and Review

- Daily inspections by supervisors
- Weekly inspections by safety officer
- Monthly safety audits

18. Signatures

- Toolbox talks
- Safety meetings
- Safety alerts
